PROFESSIONAL SUMMARY

Cybersecurity undergraduate pursuing a career in DevOps and Cloud Engineering, with hands-on experience in Kubernetes, Terraform, Docker, and CI/CD automation. Builds secure, scalable microservices with monitoring, container security, and Infrastructure as Code (IaC).

EXPERIENCE

AWS Community Leader | *AWS Student Builder Community - FAST Islamabad* **Feb 2026 – Present**

- Designed and led hands-on workshops on AWS core services, CI/CD pipelines, and Infrastructure as Code (IaC), training students to deploy cloud-based projects end-to-end.
- Mentored peers one-on-one and in small groups on Docker, Kubernetes, and CI/CD automation, guiding them from tutorials to deploying real containerized projects.

DevSecOps Officer | *Google Developer Groups on Campus FAST Islamabad* **Nov 2025 – May 2026**

- Implemented CI/CD workflows and containerized applications using Docker and GitHub Actions to support internal projects and community events, standardizing the build-and-deploy process across teams.
- Automated recurring deployment and environment-setup tasks using GitHub Actions and Infrastructure as Code practices, replacing manual steps with repeatable pipelines.

PROJECTS

AwareNet Microservices Platform | *DevSecOps Project* **Sep 2025 – Dec 2025**

- Built a Docker-based architecture of **10+ microservices** with service isolation, scalability, and fault tolerance.
- Implemented secure API Gateway with JWT authentication and RBAC authorization for inter-service communication, validated using Postman.
- Built phishing simulation and content moderation modules combining simulated attack scenarios with automated detection logic, following secure SDLC and Agile practices.

SecureKubeOps DevSecOps Pipeline | *Cloud Engineering Project* **Mar 2026**

- Built a **2-repo GitOps** pipeline (GitHub Actions, Docker, Minikube) automating **100%** of builds, Trivy scans, and rolling deployments.
- Configured Prometheus and Grafana to scrape **50+ system and application metrics**, enabling real-time Kubernetes cluster observability.
- Debugged and resolved image pull failures, pipeline authentication errors, and Kubernetes Service misconfigurations during pipeline development.

AWS Cloud Automation with Terraform | *Infrastructure as Code Project* **Jan 2026 – Present**

- Provisioned and managed AWS infrastructure over a **10-week structured progression**, automating a different core service each week with Terraform, including EC2, Lambda, RDS, and CloudWatch.
- Configured IAM roles, VPC networking, and Security Groups following least-privilege and secure network design.

CERTIFICATIONS & TRAINING

- AWS Certified Solutions Architect – Associate (In Progress)** – Amazon Web Services **Sep 2026**
- Oracle Cloud Infrastructure (OCI) DevOps Professional** – Oracle **Oct 2025**
- Oracle Cloud Infrastructure (OCI) Architect Associate** – Oracle **Oct 2025**
- Google Cloud Cybersecurity Specialization** – Google **Nov 2025**
- TryHackMe DevSecOps Certificate** – TryHackMe **Feb 2026**
- Positive Hack Camp 2026** – Positive Technologies, Moscow, Russia **Aug 2026**
Selected from 800+ applicants across 20 countries for a two-week offensive security intensive in privilege escalation and web application exploitation; sponsored by Positive Technologies.

TECHNICAL SKILLS

- Cloud & IaC:** AWS (EC2, VPC, IAM, S3, Lambda, RDS, CloudWatch), Cost Optimization, Azure, Terraform, Ansible, GCP, OCI
- DevOps Tools:** Docker, Kubernetes, Container Orchestration, Helm, Minikube, Jenkins, Git, GitHub, GitHub Actions, GitOps, CI/CD
- Monitoring & Security:** Prometheus, Grafana, Trivy, Vulnerability Assessment, SAST/DAST, Incident Response, RBAC, JWT, IAM
- Systems & Networking:** Linux Administration, Kali Linux, Bash Scripting, Nginx, Load Balancing, High Availability, Networking (TCP/IP, DNS, Subnetting, Routing)
- Programming:** Python, C++, SQL
- Familiar With:** Argo CD, SonarQube, OWASP ZAP, ELK Stack, Istio

EDUCATION

FAST NUCES Islamabad | Bachelor of Science (BS), Cyber Security **CGPA: 3.25** **2024 – Expected 2028**
